SUSTAIN III® Cattle Bolus & SUSTAIN III® Calf Bolus
Antibacterial Sulfamethazine
Sustained Release Bolus (72 hours)

**FEATURES**
- Broad-spectrum activity against a wide variety of cattle diseases
- Therapeutic levels of sulfamethazine in just 6 hours time
- 72 hour persistence of therapeutic effect (3 day)
- Boluses scored for accurate dosing
- Meets BQA orals standards

**BENEFITS**
- Effective broad-spectrum activity
- Reduces losses from handling stress & time/labor expenses
- Fast-acting therapeutic effect
- Ideal for receiving programs
- Proprietary drug formulation (NADA)
- Cost effective “first line” therapy

**INDICATIONS**

SUSTAIN III® Cattle Bolus
ANTIBACTERIAL SULFAMETHAZINE
SUSTAINED RELEASE BOLUS (72 HOURS)

CAUTION:
This drug, like all sulfonamides, may cause toxic reactions and irreparable injury unless administered with adequate and continuous supervision; follow recommended dosages carefully.

WARNING:
Animals intended for human consumption should not be slaughtered for food for at least 12 days after the last dose. Exceeding two (2) consecutive doses may cause violative tissue residues to remain beyond the withdrawal time. Do not use in female dairy cattle 20 months of age or older. Use of sulfamethazine in this class of cattle may cause milk residues. Do not use in calves under one (1) month of age or calves being fed an all-milk diet. Use in these classes of calves may cause violative residues to remain beyond the withdrawal time.

SUSTAIN III® Calf Bolus
ANTIBACTERIAL SULFAMETHAZINE
SUSTAINED RELEASE BOLUS (72 HOURS)

CAUTION:
This drug, like all sulfonamides, may cause toxic reactions and irreparable injury unless administered with adequate and continuous supervision. Follow recommended dosages carefully. Fluid intake must be adequate at all times throughout the three-day therapy provided by the sustained release bolus. This product has not been shown to be effective on non-ruminating calves.

Residue Warning: Animals intended for human consumption should not be slaughtered for food for at least 12 days after the last dose. Exceeding two (2) consecutive doses may cause violative tissue residue to remain beyond the withdrawal time. Do not use in calves under one (1) month of age or calves being fed an all-milk diet. Use in these classes of calves may cause violative residues to remain beyond the withdrawal time. Do not use in female dairy cattle 20 months of age or older. Use of sulfamethazine in this class of cattle may cause milk residues.
